Jun 2024 – Present

*Contract • Application/Backend Developer (PHP, Laravel, Oracle, Node.js, TailwindCSS)*

*Naga City, Camarines Sur*

- Designed the conceptual database schema in Oracle using ERD and optimized data rendering of thousands of records by PL/SQL queries, views, procedures, indexing, functions, SSR and CSR.
- Crafted and applied a data migration plan to perform a **large-scale migration of up to 3,000,000+ records** from MySQL and Postgres to Oracle with a **99.82% success rate**, resulting in unified data records.
- Enforced clean architecture to the project with advanced OOP concepts. Wrote clear technical and project documentation, i.e., ERD, user manual, Gantt chart, swimlane, data dictionary, and code documentation.

### Ateneo de Naga University – Project RETSU

Jan 2024 – Mar 2024

*Contract • Lead Application Developer (PHP, Laravel, Oracle, Node.js, TailwindCSS)*

*Naga City, Camarines Sur*

- Developed a digital queue management solution that processed 200-700+ daily requests enhancing operational efficiency while minimizing average wait times for clients and eliminating the inconveniences associated with traditional queuing.
- Integrated online queueing for students with QR access and a real-time queue status view for clients with customizable controls through admin management.
- Solved complex real-time bugs and optimized frontend, backend, and database by improving SQL queries and data handling, increasing system efficiency by 84%, enabling seamless page loads with **69,000+** transactions per branch.

### Department of Agriculture – Project DAAMIA

Sep 2022 – Oct 2023

*Subcontract • Full-Stack Developer (C#, .NET Framework, MSSQL)*

*Pili, Camarines Sur*

- Developed a weather monitoring system; processing and storing large datasets from a government local weather API.
- Created a background service built using C# WinForms for fetching and storing **10,000+ records per day** of real-time weather data per station into the database.
- Implemented SMTP and enforced backend security for handling RESTful API requests, preventing server overload.
