WORK EXPERIENCE

Ateneo de Naga University – Project HRIS (Phase 1 and 2)

June 2024 - Present

Naga City, Camarines Sur, 4400

Contract • Lead Full-Stack Web Developer

- Developed key modules of the application ranging from **reports, management, design, data processing/analysis, and hardware configuration** resulting in a **drastic improvement** to the HR's workflow in terms of **eliminating the manual processes**.
- Optimized **data rendering** and fetching of employee records on thousands of records by usage of optimized PL/SQL queries, views, procedures, indexing, functions, server-side implementations & SSR, batch processing and client-side rendering (CSR).
- Crafted and applied a data migration plan** to perform a **large-scale migration of up to 3,000,000+ records** from MySQL and Postgres to Oracle, resulting in **unified data records** of HRMO in the main database repository of the University.

Ateneo de Naga University – Project RETSU

Jan 2024 – Mar 2024

Naga City, Camarines Sur, 4400

Contract • Lead Full-Stack Web Developer

- Developed a queue management system solution for the University, which enhanced the user experience by **reducing queue delays** and eliminating the inconveniences associated with traditional queuing systems.
- Optimized front-end, back-end, and database by improving SQL queries and data handling, increasing system efficiency by 84% and enabling **seamless page loads with 26,000+ transactions** per branch.
- Developed the entire system within a stringent two-month development and deployment timeframe, followed by a five-month maintenance period, while adhering to strict deadlines and managing time-sensitive pressures.

Department of Agriculture – Project DAAMIA

Sep 2022 - Oct 2023

Pili, Camarines Sur, 4418

Subcontract • Lead Full-Stack Web Developer

- Developed a weather monitoring system by processing and storing large number of datasets from a government local weather API.
- Created a background service built using C# WinForms for fetching and storing 10,000+ records per day of real-time weather data per station into the database.
- Implemented SMTP and **enforced backend security** for handling **RESTful API requests**, preventing server overload.
