WORK EXPERIENCE

-  **Ateneo de Naga University – Project HRIS & ADNUONE (Phase 1 and 2)** June 2024 – Present
Contract • Lead Full-Stack Web Developer (PHP, Laravel, Oracle) Naga City, Camarines Sur, 4400
 - Developed key modules of the application ranging from **reports, management, design, data processing/analysis, and hardware configuration** resulting in a **drastic improvement** to the HR's workflow in terms of **eliminating the manual processes**. Enforced clean architecture to the project with advanced OOP concepts.
 - Designed the database schema in Oracle using **ERD** and optimized **data rendering** and fetching of employee records on thousands of records by usage of optimized PL/SQL queries, views, procedures, indexing, functions, server-side implementations, batch processing, and client-side rendering (CSR).
 - Crafted and applied a data migration plan** to perform a **large-scale migration of up to 3,000,000+ records** from MySQL and Postgres to Oracle with **99.82% success rate**, resulting in **unified data records** within the University.
-  **Ateneo de Naga University – Project RETSU** Jan 2024 – Mar 2024
Contract • Lead Full-Stack Web Developer (PHP, Laravel, Oracle) Naga City, Camarines Sur, 4400
 - Developed a queue management system solution for the University, which enhanced the user experience by **reducing queue delays** and eliminating the inconveniences associated with traditional queuing systems in AdNU.
 - Optimized front-end, back-end, and database by improving SQL queries and data handling, increasing system efficiency by 84% and **enabling seamless page loads with 26,000+ transactions** per branch.
 - Developed the entire system within a stringent two-month development and deployment timeframe, followed by a five-month maintenance period, while adhering to strict deadlines all including the development for writing RESTful APIs, modules, project documentation, design, and tests to client and development.
-  **Department of Agriculture – Project DAAMIA** Sep 2022 – Oct 2023
Subcontract • Lead Full-Stack Web Developer (C#, .NET Framework, MSSQL) Pili, Camarines Sur, 4418
 - Developed a weather monitoring system by processing and storing large number of datasets from a government local weather API. Created a background service built using C# WinForms for fetching and storing 10,000+ records per day of real-time weather data per station into the database.
 - Implemented SMTP and **enforced backend security** for handling **RESTful API requests**, preventing server overload.
